Since 2006, OnCorps Reports™ has helped State AmeriCorps Commissions and Programs meet their reporting, fundraising, assessment, and evaluation objectives.

Reports are designed to make e-Grants and AmeriCorps Portal reporting easier, and forms are updated annually to align with changes in CNCS policies. Data collected in OnCorps Reports™ can be easily downloaded for use in Excel, Access, or other standard database programs—or we can create a custom API to exchange data directly with your internal reporting system.

Our staff includes former AmeriCorps program directors and members, so we understand your unique reporting needs—as well as your time and budget constraints.
